3	0004	133 x 20
4	0005	155 x 20

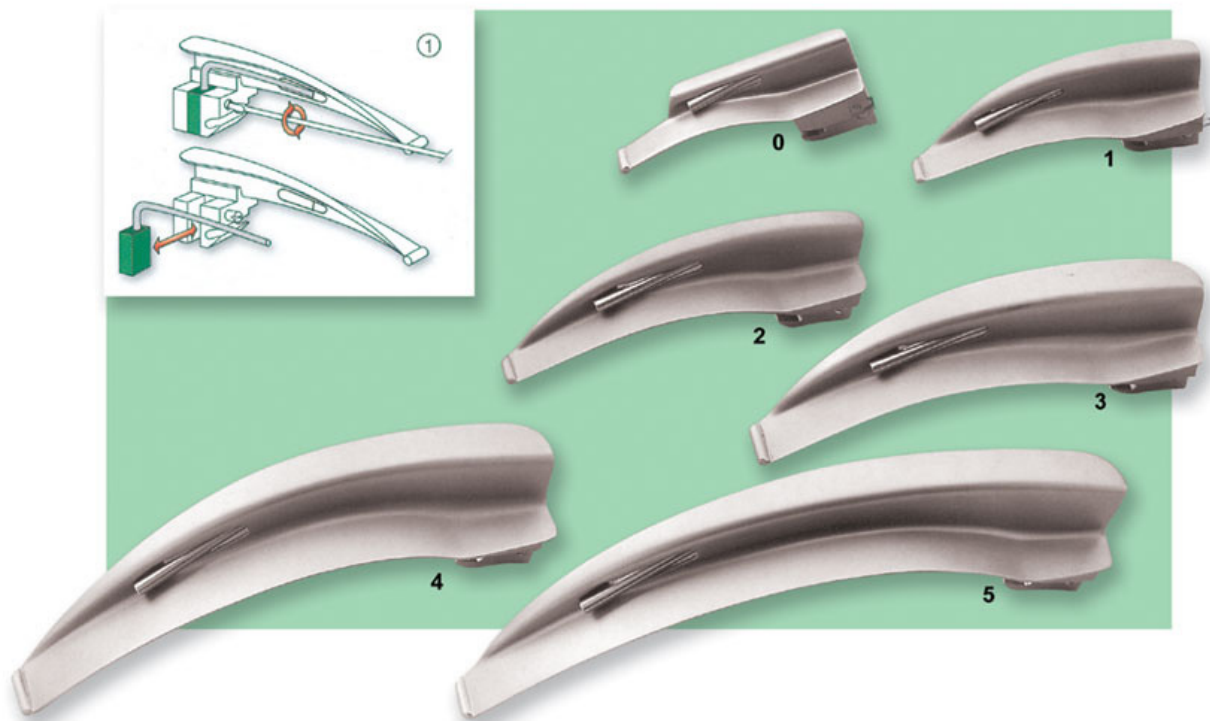

PSI laryngoscopes are modern, extremely reliable and durable quality instruments and correspond to international standard DIN 58870. An efficient 4.5 mm **Xenon** light guarantees an excellent illumination. The Xenon lamp is integrated in the handle of all *PSI* fibre-optic laryngoscopes. A good visibility increases the security for doctor and patients at the intubation process. A wide range of blades of various sizes enables the adaptation to most difficult anatomical circumstances.

Die *PSI* Laryngoskope sind moderne, äußerst zuverlässige und langlebige Qualitäts-instrumente und entsprechen dem internationalen Standard DIN 58870. Ein leistungsstarkes 4,5-mm-**Xenon**licht gewährleistet eine hervorragende Ausleuchtung. Bei allen *PSI* Fiber Optik-Laryngoskopen ist die **Xenon**lampe im Griff integriert. Gute Sicht erhöht die Sicherheit für Arzt und patienten beim intubationsvorgang. Ein umfangreiches Sortiment von Spateln verschiedener Größen ermöglicht die Anpassung an schwierigste anatomische Verhältnisse.

①

Macintosh blades with *replaceable* fibre-optics
Macintosh Spatel mit *auswechselbarer* Fiber Optik

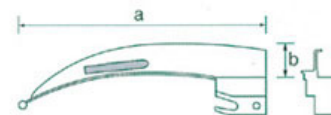

Die Alternative: Statt der Neuanschaffung eines Spatels wechseln Sie im Bedarfsfall lediglich den Lichtleiter aus.

The alternative: Instead of buying a new blade, you only change the light guide, if necessary.

① Einfaches Wechseln des Lichtleiters

① Easy replacement of the light guide

3	0013	130 x 22
4	0014	150 x 25

FlapLight F.O., Macintosh with replaceable fibre-optics. The movable blade tip facilitates lifting of the epiglottis and enables a good visibility at the intubation process even in case of difficult anatomical conditions. An improved visibility and a lower lever action reduce the risk of injury of the larynx and the teeth. The replacement of the fibre-optic light guide cannot be made personally, but the blade has to be returned to **PSI**!

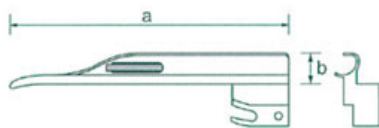

FlapLight case, only, for 2 blades and 1 handle
blades sizes 3 + 4
REF 28 802

FlapLight F.O., Macintosh mit auswechselbarer Fiber Optik. Die bewegliche Spatelspitze erleichtert das Anheben der Epiglottis und ermöglicht auch bei schwierigen anatomischen Verhältnissen die Intubation unter Sicht. Bessere Sicht und weniger Hebelwirkung reduzieren das Verletzungsrisiko für Larynx und Zähne. Das Auswechseln der Fiber Optik kann nicht selbst vorgenommen werden. Der Spatel muss daher an **PSI** eingesandt werden!

Conventional laryngoscopes Konventionelle Laryngoskope

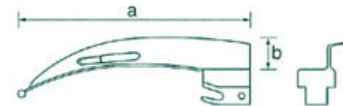

Macintosh blades, conventional
Macintosh Spatel, konventionell

PSI provide a versatile range of conventional warmlight laryngoscopes. These instruments are of the same high and robust quality than the fibre-optic programme. The conventional *PSI* laryngoscopes have proved to be extremely reliable, precise and safe in practice for a long time. They guarantee an easy handling and a quick changing of the blade.

PSI bietet ein vielseitiges Sortiment an konventionellen Warmlicht-Laryngoskopen. Dies sind ebenso hochwertige, robuste Qualitätsinstrumente wie das Fiber-optikprogramm. Die Konventionellen *PSI* Laryngoskope haben sich seit langem in der Praxis als äußerst verlässlich, präzise und sicher bewährt. Sie garantieren eine leichte Handhabung und ein schnelles Wechseln der Spatel.
